HIRA TRAINING COURSE ON SOCIAL HEALTH INSURANCE

INTRODUCTION

In September 2015, the 70th UN General Assembly announced the Sustainable Development Goals (SDGs) to be achieved by the international community by 2030. Also, the action plans were selected to protect the health of humanity through **Universal Health Coverage (UHC)**. UHC has been internationally recognized by the international community with the efforts to improve the quality of healthcare services and maintain an adequate level of rapidly increasing healthcare expenditure. Due to growing demand of the international community, HIRA has endeavored to share its knowledge and experiences with other countries. In this context, HIRA established the **“HIRA Global UHC Campus”** to contribute to expanding the world’s access to UHC by building capacity in the management of healthcare systems.

As the first program of “HIRA Global UHC Campus”, HIRA has hosted Medical Audits Collaborative (MAC) as a facilitator with Joint Learning Network for Universal Health Coverage (JLN) to share HIRA’s experience and help other countries learn from each other. MAC has developed the Medical Audits Toolkit which will be launched in upcoming April with 25 healthcare experts from 10 JLN member countries. The other programs of “HIRA Global UHC Campus” include Official Development Assistance, Knowledge Sharing Program, International Symposium and International Training Course.

Continuing efforts to shed light on international cooperation and build a consensus of the international community, HIRA intends to host the “HIRA Training Course on Social Health Insurance” at HIRA Global UHC Campus, jointly with: the Korean Ministry of Health and Welfare (MOHW), National Health Insurance Service (NHIS), the World Health Organization Western Pacific (WHO/WPRO), and the United Nations Economic and Social Commission for Asia and the Pacific (UNESCAP).

“HIRA Training Course on Social Health Insurance” at HIRA Global UHC Campus will be run from July 24 to July 28, 2017. This course is expected to contribute to helping participants better understand Korea’s Social Health Insurance System, and improve their own health insurance system.

OBJECTIVES

Expected Results

By learning about HIRA's operation:

- Participants will deepen their understanding of performance improvement, financing, and policy-making process in national healthcare system
- Participants will gain a firm understanding of the claims review, quality assessment, and benefit criteria management of Korea's health insurance system.
- Participants will understand how to operate each function efficiently by utilizing ICT system.
- Participants will be able to apply what they learned from this course in building and improving their own systems.

Target Participants

- Senior-level government officials and experts actively involved in introducing or developing government-initiated healthcare or health insurance programs in developing countries
- Officials or healthcare experts of international organizations, such as WHO and UNESCAP
- Professionals working in relevant fields, including cost management and quality improvement of healthcare system

PROGRAMS

Lectures

- Introduction of HIRA
- Health Insurance Payment System of Korea
- Claims Review System (including review process and appeal process)
- Benefit Criteria Management
